About Evergreen

[Search](#)

Evergreen is software that helps patrons find library materials, and helps libraries manage, catalog, and circulate those materials, no matter how large or complex the libraries.

Evergreen is also people: a community of users, developers, and enthusiasts that work together to maintain, develop, and improve the software. Over 1,300 libraries use Evergreen, and the software is constantly updated, with two major releases each year. Dozens of users contribute code to each new release.
