

Blanket Orders

A “Blanket Order” is a special type of [Direct Charge](#) that can be used to encumber an amount of money to be paid down over a period of time using multiple invoices. Blanket orders do not link to a line item or a bibliographic record.

Things to Know

- The Blanket Order direct charge should only be added to purchase orders.
- A purchase order with a Blanket Order can also have line items.
- A purchase order can have multiple Blanket Order charges.
- A Blanket Order charge is considered open until its purchase order is “finalized” (received).
- “Finalizing” a purchase order changes the purchase order’s status to received (assuming there are no pending line items on the purchase order) and fully disencumbers all Blanket Order charges on the purchase order by setting the debit amount to \$0 on the original debit for the charge.
